

# CRA

## Community Risk Assessment:

Community Risk Assessment (CRA) is a dashboard that identifies and predicts the geographic areas that are most affected by a disaster.

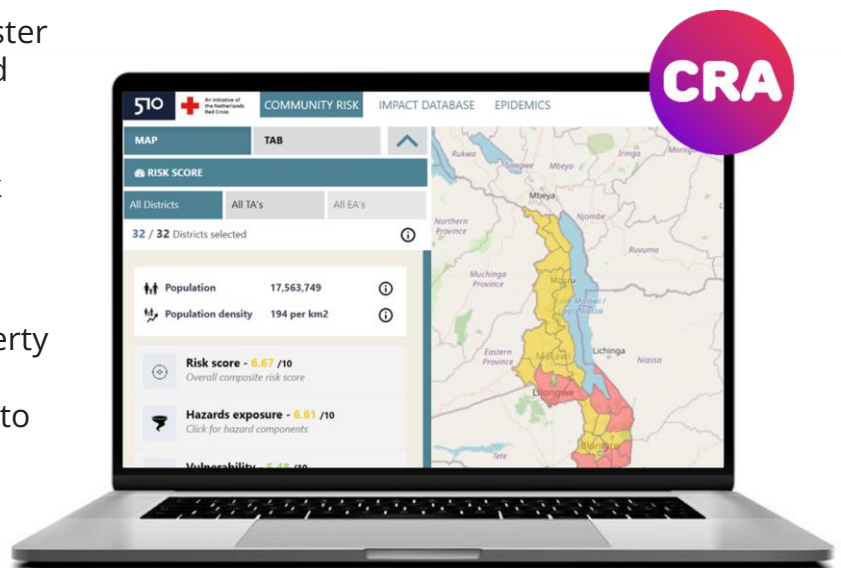

[www.510.global/CRA](http://www.510.global/CRA)

**“Anticipatory action is increasingly recognized as a key solution to reduce the impacts of climate change and extreme weather event.”**

IFRC Operational Framework for Anticipatory Action 2021-2025

✓ Uses all relevant pre-disaster data sources on a detailed geographical level:

1. Long-term Hazard Risk (based on historical events): e.g. flood and drought risk
2. Vulnerability: e.g. poverty
3. Lack of Coping Capacity: e.g. distance to the nearest hospital
